

# T22

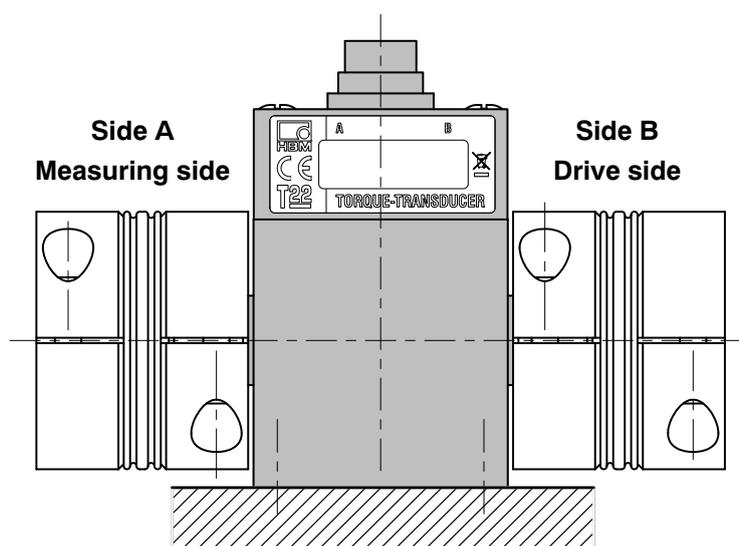

## Torque transducer

### Special features

- Nominal (rated) torques 5 N·m, 10 N·m, 20 N·m, 50 N·m, 100 N·m, 200 N·m, 500 N·m and 1 kN·m
- Nominal (rated) rotational speeds of 9000 rpm to 16 000 rpm
- Accuracy class: 0.5
- Contactless transmission of measurement signals
- Measurement on rotating or stationary parts
- Cylindrical shaft ends for non-play friction joints
- $\pm 5$  V and  $10 \pm 8$  mA torque output signal

### Installation example with two bellows couplings

## Specifications

| Type  | T22   |             |         |    |    |     |     |     |   |  |

<sup>2)</sup> Test severity / criterion: Industrial environment, cable length  $\leq 30$  m. Application not outside buildings.

<sup>3)</sup> Each type of irregular stress (bending moment, lateral or longitudinal force, exceeding nominal (rated) torque) can only be permitted up to its specified static load limit provided none of the others can occur at the same time. If this condition is not met, the limit values must be reduced. If 30% of the bending limit moment and lateral limit force occur at the same time, only 40% of the longitudinal limit force is permissible and the nominal (rated) torque must not be exceeded. The permissible bending moments, longitudinal forces and lateral forces can affect the measurement result by approx. 1 % of the nominal (rated) torque.

<sup>4)</sup> The nominal (rated) torque must not be exceeded.

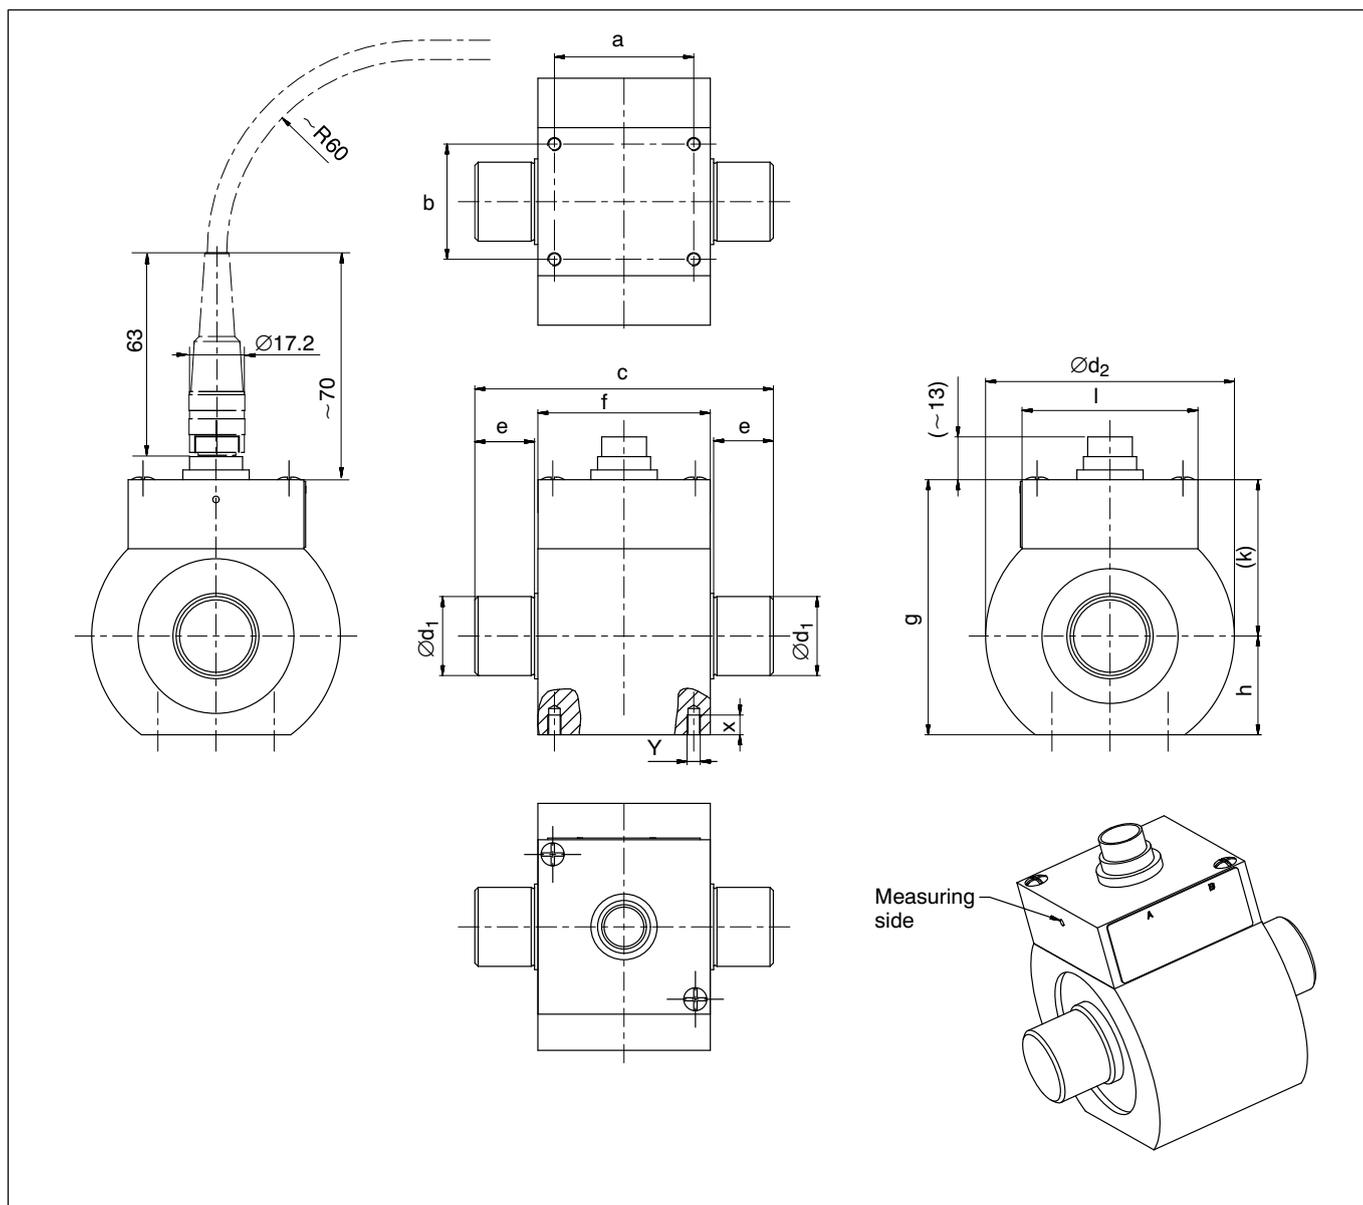

<sup>5)</sup> Please adhere to the maximum torque ( $T_{max}$ ) of the couplings.

## General instructions

- Only tighten the clamping bolts of the couplings when the shafts are mounted in the coupling hubs!
- The bellows coupling must not be overstretched beyond the specified permissible flexibility limits.
- Drive and output shafts must be free from grease and burrs.
- Implement a tolerance of j6 for the shaft diameter, to produce the preferred fit of H7/j6.

## Mounting position

The T22 torque transducer can be operated with bellows couplings in any mounting position (horizontally, vertically or at an angle). When mounting vertically or at an angle, please make sure that the additional elements are adequately supported.

## Delivery condition

The couplings and the torque transducer are delivered as separate items.

### **Accessories for the T22, to be ordered separately**

Transducer connection cable, 5 m long, order no. 3-3301.0158

Transducer connection cable, 10 m long, order no. 3-3301.0159

Cable socket, 12-pin (Binder), order no. 3-3312.0268

Bellows couplings

Junction box, order no. 1-VK20A

### **Accessories for junction box VK20A, to be ordered separately**

Connection cable, 1.5 m long (D-Sub, 15-pin – free ends), order no. 1-Kab151-1.5

Connection cable, 1.5 m long (SUBCON5 – free ends), order no. 1-Kab152-1.5

Modifications reserved.

All details describe our products in general form only.
